Subject Index

Accelerograms
Response Spectra for Bilinear Hysteretic Systems, 607

Accident data
Development of a Highway Accident Hazard Index, 725

Acetate
Kinetics of Methanogens in an Expanded-Bed Reactor, 73

Acoustic measurement
Regional Method to Assess Offshore Slope Stability, 317
Saudi Petrochemical Plant Noise Control, 130

Activated carbon treatment
Bugs and Carbon Make a PACT, 877
Evaluating Field Scale GAC Systems for Drinking Water, 115

Activated sludge
Flocculant Settling Dynamics Under Constant Load, 74
Gas-Liquid Interactions in Oxygen Activated Sludge, 67

Active control
Active Control of Floating Structures, 244
Pseudo-Dynamic Testing of Structures, 190

Active earth pressure
The Arch in Soil Arching, 12
Static Earth Pressures With Various Wall Movements, 304

Administration
Streamlining the Building Permit Process, 495

Admixtures
Asphalt Pavement Modifiers, 871
Volume and Strength of a Dolos, 835

Adsorption
Adsorption Characteristics of Fluoride onto Hydrous Alumina, 132
Evaluating Field Scale GAC Systems for Drinking Water, 115
Multi-Stage Air Flotation of Tar Sand Wastewater, 273

Advection
Advective Acceleration and Mass Transport in Estuaries, 416

Aeration
Multi-Stage Air Flotation of Tar Sand Wastewater, 273
Slack Tide Oxygen Balance Model, 127

Aerial photographs
Low Cost Mapping for Long Range Planning, 682
Method for Computing Bed Profiles During Floods, 412

Aerodynamic forces
Wind Effects on Compliant Offshore Structures, 1006

Aerodynamics
Advancements in Aerodynamics, Fluid Mechanics and Hydraulics, 958
Aerodynamic Behavior of Cylindrical Shell, 269
Bluff Body Aerodynamics, 606
Design of a Cable-Stayed Steel Composite Bridge, 527
Role of Indicial Functions in Buffeting Analysis of Bridges, 1
Synthesis of Fluctuating along Wind Loads on Buildings, 185

Aeronautics
Gustave Eiffel: A Biographical Sketch, 585

Aggradation
River-Bed Profiles with Imposed Sediment Load, 376

Aggregates
Computer Assisted Pavement, 925

Aging
E_T for Tensile Prestrained Tubular Struts, 566
Response of Aging Linear Systems to Ergodic Random Input, 200

Agitation intensity
Characterization of Agitation Intensity in Flocculation Processes, 139

Agricultural engineering
Controlled Agricultural Drainage to Maintain Water Quality, 459

Agricultural watersheds
Sediment Yield from Agricultural Watersheds, 362

Agriculture
Environmental Impacts of Irrigation Projects, 465

Air classifiers
Comparing Pulsing Classifiers for Waste-to-Energy, 272
Passive-Pulsing Air Classifiers for Energy Production, 274

Air flow
Two Characteristic Features of the Airflow Boundary Layer over Sand, 426

Air pollution
Calibration of a Cyclone for Monitoring Inhalable Particles, 95

Air quality
Environmental Engineering, 970

Air stripping
Air Stripping of Volatile Organic Compounds Using Structured Media, 114

Air temperature
St. Lawrence River Freeze-Up Forecast, 821
Structural Analysis of Sealed Insulating Glass, 568

Air water interactions

Wind Function for a Sheltered Stream, 88

Aircraft
Multiattribute Aircraft Choice for Airline Network, 737

Airlines
Multiattribute Aircraft Choice for Airline Network, 737

Airport access
Economic Aspects of Rail Access to Airports, 707
Study of Airport Access Mode Choice, 730

Airport design
Planning of Concessions in Airport Terminals, 702

Airport runways
Concrete Pavers for Aircraft Pavement Surfaces, 735
New Runway Takes Off, 951

Airport terminals
Planning of Concessions in Airport Terminals, 702

Airports
Multiattribute Aircraft Choice for Airline Network, 737
Utilities, Buildings, and Land Management System, 680

Alfalfa
Rational Use of the FAO Blaney-Criddle Formula, 450

Algae
Mechanisms and Process Parameters of Filter Screens, 463

Algorithms
Dynamic Behavior of Deep-Ocean Pipeline, 799
Fuzzy Set Approach to Linguistic Seismic Load and Damage Assessments, 220
Hydraulic Design Algorithms for Pipe Networks, 438
Looped Water Distribution System Optimization for a Single Loading, 80
Recent Developments in Structural Optimization, 994

Alluvial channels
Flow and Bed Profile in Meandering Sand-Silt Rivers, 394
Meander Flow Model I: Development, 433
Meander Flow Model II: Applications, 434
Sediment Control by Submerged Vanes, 436

Alluvial streams
Armoring and Sorting Simulation in Alluvial Rivers, 403
Curvature Ratio and Rate of River Bend Migration—Update, 419
Method for Computing Bed Profiles During Floods, 412

Alumina
Adsorption Characteristics of Fluoride onto Hydrous Alumina, 132

Ammonia
Chloramines: A Better Way?, 869
Model of Ammonia and Carbon Oxidation in Biofilms, 118

Anaerobic digestion
Fundamentals of Anaerobic Digestion of Wastewater Sludge, 122

Anaerobic processes
Kinetics of Methanogens in an Expanded-Bed Reactor, 73

Analysis
Expert Systems in Civil Engineering, 972

Analytical techniques
Advances in Analysis of Structural Masonry, 959
An Analytical Solution of the Resection Problem, 679
Analytical Strip Solution to Rectangular Plates, 184
Analytical Studies of Building Cladding, 539
Dynamic Response of Structures, 965
Elastic Stiffness of Bridge Columns with Parabolic Flare and Foundation Springs, 612
FE Analyses: Compaction-Induced Stresses and Deformations, 289
Hydrodynamic Pressures on Dams with Nonvertical Upstream Face, 250
Moment-Rotation Curves for Bolted Connections, 536
A Transitional Yielding Model for Clay, 297

Anchorages
Anchorage Requirements for Wind-Loaded Empty Silos, 515
A Simple Model for Reinforcing Bar Anchorages Under Cyclic Excitations, 601

Anchors
Interaction Analysis of Anchor-Soil Systems, 320
Soil Anchors and Constitutive Laws, 354

Anemometers
Open-Channel Flow Measurements with a Laser Doppler Anemometer, 381

Anisotropy
Artesian and Anisotropic Effects on Drain Spacing, 443
Loading of Anisotropic Quarter Plane, 248
Stress Distribution in Anisotropic Compliance of a Jointed Rock, 330
Torsion of Nonhomogeneous and Transversely Isotropic Half-Space, 254

Anistropic soils
Bounding Surface Plasticity III: Application to Anisotropic Cohesive Soils, 266
Creep of Anistropic Clay: Microplane Model, 314

Approximation methods
Estimating Periods of Vibration of Tall Buildings, 559

Aquatic habitats
Disney Engineers Voyage to the Deep, 860

Aquatic plants
Macrophyte Growth in Shallow Streams: Field Investigations, 125
Macrophyte Growth in Shallow Streams: Biomass Model, 126
Wastewater Treatment and Renovation by Different Duckweed Species, 79

Aqueducts

Structural Design of the Point du Gard, 503

Aquifers

Clean-up in the Rockies, 851

Clogging of Recharge Wells by Suspended Solids, 456

Groundwater Management by Chance-Constrained Model, 745

Modeling Two-Well System in a Stratified Aquifer, 754

Archaeology

Terzaghi Lectures—1974-1982, 1000

Arches

The Arch in Soil Arching, 12

Buckling and Vibration of Arches and Tied Arches, 587

On the Optimality Criteria for Archgrids, 508

Stability of Masonry Arches, 642

Arching

Soil Arching in Sandy Slopes, 326

Static Earth Pressures With Various Wall Movements, 304

Arctic engineering

Steady-State Ice-Structure Interaction Analysis, 246

Thermoerosion of Frozen Sediment Under Wave Action, 794

Arizona

Central Arizona Project Supervisory Control System, 772

Armor units

Armor Layer Stability of Rubble-Mound Breakwaters, 811

Stability of Blocks as Breakwater Armor Units, 655

Use of Grout-Filled Sausages in Coastal Structures, 791

Arterial highways

Coordination of Actuated Arterial Traffic Signal Systems, 722

Artesian pressure

Artesian and Anisotropic Effects on Drain Spacing, 443

Artificial intelligence

Artificial Intelligence, 155

Electronic Computation, 969

Future Directions for Computerized Construction Research, 42

Artificial islands

Overload Bore Propagation Due to an Overtopping Wave, 795

Asbestos

The Asbestos Impasse, 852

Problems Associated with Removal of Asbestos, 32

ASCE Activities

Member Services through a Local ASCE Office, 158

The Role of ASCE in CICE Implementation —Recommendations by the Task Committee on Productivity, 40

ASCE Awards & Prizes

Accuracy of Short-Wave Numerical Models, 6

The Arch in Soil Arching, 12

Construction Management: MARTA in Retrospect, 13

Discussion of: Wastewater Field Thickness and Initial Dilution, 4

Environmental Aspects of Waste Utilization in Construction, 2

Estimating Mean Velocity in Mountain Rivers, 3

Hydraulic Fracturing in Embankment Dams, 8

Oil Sludge Solidification Using Cement Kiln Dust, 11

Role of Indicial Functions in Buffeting Analysis of Bridges, 1

Shear Links in Eccentrically Braced Frames, 9

Specific Resistance Measurements: Methods and Procedures, 10

Stochastic Combination of Load Effects, 7

Water Quality Prediction in Mixing Zones of Rivers, 14

Work Area Traffic Control: Evaluation and Design, 5

ASCE Board of Direction

How Do Technologists Fit In?, 874

ASCE Committees

The Role of ASCE in CICE Implementation —Recommendations by the Task Committee on Productivity, 40

ASCE Membership

How Do Technologists Fit In?, 874

ASCE Outstanding Civil Engineering

Top Projects of 1986, 903

The Tunnel that Cleaned Up Chicago, 899

ASCE Policy

How Do Technologists Fit In?, 874

Metrication and American Society of Civil Engineers, 149

Who Should be Responsible for Structural Steel Design?, 152

ASCE Publications

Metrication and American Society of Civil Engineers, 149

ASCE Sections

Member Services through a Local ASCE Office, 158

ASCE Service to Members

Member Services through a Local ASCE Office, 158

ASCE Younger Members

Civil Engineers' Image: Are Younger Members Our Messiah?, 169

Asphalt mix design

Asphalt Pavement Modifiers, 871

Asphalt pavements

Asphalt Pavement Modifiers, 871

Computer Assisted Pavement, 925

Asphalts

Deformation Mechanism in Asphaltic Concrete, 694

Deformation of Asphalt Concrete Linings on Slopes, 252

Polychlorinated Biphenyls in Bituminous Materials, 711

Asymmetric structures

Inelastic Earthquake Response of Asymmetric Structures, 519

Asymptotic series

Natural Frequencies and Modes of Inclined Cables, 505

Atmospheric pressure

Structural Analysis of Sealed Insulating Glass, 568

Attenuation

Attenuation of Shocks by Viscoelastic Support, 218

Australia

Games People Play with Cost Control in Australia, 61

Automation

CAD Mapping Trailblazer, 884

Water and Wastewater, Time to Automate?, 843

Auto-regressive models

Z-Transform Modeling of P-M Wave Spectrum, 230

Auto-regressive moving-average model

Example of Flow Forecasting with Kalman Filter, 411

Z-Transform Modeling of P-M Wave Spectrum, 230

Avalanches

Computer Modeling of Large Rock Slides, 306

Axial compression

Compression Behavior of Concrete Masonry Prisms, 535

Axial forces

R/C Space Frames with Column Axial Force and Biaxial Bending Moment Interactions, 596

Axial loads

Base Plates under Axial Loads and Moments, 570

Buckling of Tapered Bars under Stepped Axial Loads, 581

Combined Bending and Axial Loading in Lumber, 669

Design of Wood Members Under Combined Load, 637

Transformed-Section Model for Composite Beams Based on Axial Stiffness, 653

Backfills

Load Reduction Factors for Buried Clay Pipes, 709

Long-Term Behavior of Buried Large-Span Culverts, 312

Rigid Culvert Finite Element Analyses, 334

Static Earth Pressures With Various Wall Movements, 304

Backwater

Friction Slope Averaging in Backwater Calculations, 435

PIBS Model for Surcharged Pipe Flow, 370

Selecting Terminal Water Surface Elevations, 386

Bacteria

Bugs and Carbon Make a PACT, 877

Barges

Estimating the Resistance of a 5 × 3 Barge Tow Moving in Shallow Water, 825

Wave Interactions between Barges, 815

Barrier islands

Tidal Circulation in North Biscayne Bay, 831

Barriers

Analyzing Permanent Drift Due to Cyclic Loads, 323

Bars

Buckling of Tapered Bars under Stepped Axial Loads, 581

A Simple Model for Reinforcing Bar Anchorages Under Cyclic Excitations, 601

Base isolation

Isolating Earthquakes, 954

Base plates

Base Plates under Axial Loads and Moments, 570

Basins

Engineering Model for Well-Mixed Tidal Basin, 829

Batch processing

Treating Sewage in One Tank, 873

Bauschinger effect

E_T for Tensile Prestrained Tubular Struts, 566

Bayesian analysis

Statistical Model of Boulder Size and Fraction, 292

Beach nourishment

Artificial Beach Nourishment on Belgian East Coast, 828

Bluff Recession Rates in Chesapeake Bay, 796

Economics of Beach Nourishment under Scenario of Rising Sea Level, 816

Beaches

Results of Cross-Shore Transport Experiments, 797

Beam columns

3D Beam-Column Element with Generalized Plastic Hinges, 222

Analytical Studies of Hysteretic Behavior of R/C Joints, 599

Combined Bending and Axial Loading in Lumber, 669

Effective Length Factor for Restrained Beam-Column, 511

Inelastic Buckling Tests on Beam-Columns, 530

Joint Rotation and Geometric Nonlinear Analysis, 551

Reinforced Concrete Joints under Cyclic Loading, 554

Local Buckling Behavior of Beam-Columns, 659

Beams

Behavior of Epoxy Repaired Beams under Fire, 552

Buckling Capacities of Monosymmetric I-Beams, 654

Experimental Buckling Loads of Water-Loaded Beams, 623

Fatigue of Partially Prestressed Concrete, 529

Flexural Waves in Beam of Elastic Nonlocal Material, 219

Fracture Behavior of Ferrocement Beams, 593
Free Vibration Behavior of Prestressed Beams, 522
Free Vibration of Combined Dynamical Systems, 177
Frequency-Dependent Matrices, 502
Impact Deflection Analysis of Concrete Beams, 578
Local Web Buckling of Coped Beams, 650
Optimum Hole Shapes in Beams under Pure Bending, 205
Plastic Analysis of Floating Beams, 191
Sensitivity Study of Optimum RC Restrained End T-Sections, 620
Shear Strength of Fibrous Concrete Beams Without Stirrups, 634
Stiffening of Linked Shear Walls, 193
A Stiffness Matrix for Geometric Nonlinear Analysis, 550
Stress Distribution in Deep Beams with Web Openings, 569
Time-Dependent Cyclic Deflections in R/C Beams, 555

Beams, cantilever
Optimal Elastic Design with Constrained Taper: Prescribed Deflections, 236

Beams, support
Energy Dissipation in RC Beams Under Cyclic Load, 614

Beams, supports
Buckling of Monosymmetric I-Beams Under Moment Gradient, 546

Bearing capacity
Bearing Capacity of Bored Cast-in-Place Concrete Piles on Oil Sand, 355
Bearing Capacity Tests on Reinforced Sand Subgrades, 331
Bearing Strength of Bolted Timber Joints, 639
Plastic Analysis of Floating Beams, 191
Probabilistic Analysis of Offshore Site Exploration, 349

Bed load
Expected Transport Rate of Material on Seabed, 414

Bed load movement
Application of Sediment Pick-Up Function, 415
Bed Load Transport of Sediment Mixtures, 427
Stable Channels with Mobile Gravel Beds, 401

Bed ripples
Analytical Study on Steepness of Ripples and Dunes, 373
Water Waves Over Ripples, 807

Bed roughness
Estimating Mean Velocity in Mountain Rivers, 3

Bedforms
Analytical Study on Steepness of Ripples and Dunes, 373
A Model for Flow over Two-Dimensional Bed Forms, 378

Belgium
Artificial Beach Nourishment on Belgian East Coast, 828

Bending
Analytical Strip Solution to Rectangular Plates, 184
Bending of Circular Plate by Edge Moments, 228
Combined Bending and Axial Loading in Lumber, 669
On Internal Friction Due to Wire Twist in a Bent Cable, 238
Singularity Finite Elements for Plate Bending, 225
Spline Finite Strip Analysis of General Plates, 180
Stiffness of Framing Members with Partial Composite Action, 600
Thick Rectangular Plates on an Elastic Foundation, 261

Bending moments
Deflections and Bending Moments in Buried Pipes, 717
Settlement of Simply Supported Birdge, 626
Transformed-Section Model for Composite Beams Based on Axial Stiffness, 653

Benefit cost analysis
Dredged-Material Disposal System Capacity Expansion, 765
Flood Control Benefits Revisited, 764
High Head Hydro Powerplant Evaluation, 284
Prepayment Ability to Offset Inflation, 57
Tallying Water Resources Goals, 870
Visual Impact Assessment in Benefit Cost Analysis, 739

Bentonite
Construction of Barrettes for High-Rise Foundations, 52

Biaxial bending
Design of Wood Members Under Combined Load, 637
R/C Space Frames with Column Axial Force and Biaxial Bending Moment Interactions, 596

Biaxial loads
Biaxial Properties of Structural Steel under Nonproportional Loading, 233
Constitutive Model for Biaxial Cyclic Loading of Concrete, 231
Constitutive Relations of Structural Steel Subjected to Nonproportionally Applied Stresses, 234
Stresses from Loads Over Rectangular Areas, 348

Bilinear analysis
Railroad Track Analyses and Determination of Parameters, 255

Biochemical oxygen demand
DO Sag Model for Extremely Fast River Purification, 101

Biofilm
Kinetics of Methanogens in an Expanded-Bed Reactor, 73
Model of Ammonia and Carbon Oxidation in Biofilms, 118
Performance of Deep Biofilm Reactors, 68

Biographies
Gustave Eiffel: A Biographical Sketch, 585

Biological operations
Distribution of Retention Times in Biological

Filters I: Mathematical Model, 136
Distribution of Retention Times in Biological Filters. II: Experimental Confirmation and Practical Application, 137

Biological oxygen demand
Bugs and Carbon Make a PACT, 877

Biomass
Macrophyte Growth in Shallow Streams: Biomass Model, 126

Bitumen
Polychlorinated Biphenyls in Bituminous Materials, 711

Blast effects
Modified SDOF Analysis of RC Box-Type Structures, 543
Undrained Compression Behavior of Sand, 305

Blast loads
Response of SDF Systems to Extreme Overpressure, 207
Step-Load Response Analysis by Generalized Functions, 199

Blasting
Blasting Densifies Sand, 859
A Laboratory Study of Blast Densification of Saturated Sand, 298

Blistering
On Thermal Blistering of FRP Chimney Liners, 540

Blocks
Harmonic Rocking of Rigid Block on Flexible Foundation, 258

Bluffs
Bluff Body Aerodynamics, 606
Bluff Recession Rates in Chesapeake Bay, 796

Bolts
Load Distribution among Bolts Parallel to Load, 549

Bond issues
Tax Exempt Bonds Under Attack: A Concern for Engineers, 163

Bonding
Cross-Bracing Effects in Curved Stringer Bridges, 638

Border irrigation
Derivation of Lewis-Kostiakov Intake Equation, 452
Simple Model of Border Irrigation, 453
Surface Irrigation Optimization Models, 439

Bored piles
Bearing Capacity of Bored Cast-in-Place Concrete Piles on Oil Sand, 355
Uplift Capacity of Bored Piles in Calcareous Soils, 346

Boulders
Estimating Mean Velocity in Mountain Rivers, 3
Statistical Model of Boulder Size and Fraction, 292

Boundary conditions
Open Boundary Condition in Parabolic Equation Method, 820
Thick Rectangular Plates on an Elastic Foundation, 261

Boundary element method
Free Vibration Analysis by BEM Using Particular Integrals, 226
Recent Applications in Computational Mechanics, 993
Water Waves Over Ripples, 807

Boundary layer
A Model for Flow over Two-Dimensional Bed Forms, 378
Two Characteristic Features of the Airflow Boundary Layer over Sand, 426
Viscous Effects on Evolution of Stokes Waves, 788

Boundary shear
Structure of 3-D Flow in Rectangular Open Channels, 430
Suspended Sediment in the Surf Zone, 792

Boundary value problems
Stress Analysis of a Blunted Notch in a Clamped Edge, 187
Stress Concentration in Clamped Edge of Thin Plate, 223

Bounding surface
Bounding Surface Plasticity: I: Mathematical Foundation and Hypoplasticity, 245
Bounding Surface Plasticity II: Application to Isotropic Cohesive Soils, 265
Bounding Surface Plasticity III: Application to Anisotropic Cohesive Soils, 266
Bounding Surface Plasticity Model for Sands, 260

Bracing
Computer Cuts Tower Steel, 866
The Concrete Diagonal, 933
Cross-Bracing Effects in Curved Stringer Bridges, 638
Cyclic Load Behavior of Angle-X-Bracing, 664
Cyclic Response of Steel Braces, 517
Disposable Knee Bracing: Improvement in Seismic Design of Steel Frames, 595
Inelastic Behavior of X-Bracing in Plane Frames, 545
Stiffness Requirements for Cross Bracing, 676

Breaking waves
Modeling Waves in Surfzones and Around Islands, 790

Breakwaters
Diffraction Patterns Near Narrow Breakwater Gap, 824
Stability of Blocks as Breakwater Armor Units, 655
Use of Grout-Filled Sausages in Coastal Structures, 791
Volume and Strength of a Dolos, 835
Wave Reflection from Energy Dissipation Region, 832

Brick construction
Seismic Response of Brick Buildings With Sliding Substructure, 532

Brick masonry
Advances in Analysis of Structural Masonry, 959

Construction of a Semi-Prefabricated Masonry Facade, 20
Strengthening of Unreinforced Masonry Buildings, 563

Bridge abutments
Nonlinear Analysis of Integral Abutment Bridges, 647

Bridge construction
Bridge Resting on an Ice Body at High Altitude, 38
Building a Bridge Within a Bridge, 927
Celebrating a Conquest, 935
Salvaging the Zilwaukee, 868
Spanning Urban Obstacles, 842
Sunshine Skyway Nears Completion, 939

Bridge decks
Bridging the Joints in Bridges, 941
Filling the Cracks, 930
On Modular Full Depth Bridge Deck Rehabilitation, 699
Rehabbing under Traffic, 901
Role of Indicial Functions in Buffeting Analysis of Bridges, 1

Bridge design
Beauty and the Bridge, 893
Building a Bridge Within a Bridge, 927
Cable Stays Catch On, 890
Celebrating a Conquest, 935
Design of a Cable-Stayed Steel Composite Bridge, 527
Multispan Balanced Suspension Bridge, 663
Steel Bridge Counterattack, 929

Bridge foundations
Bridge Resting on an Ice Body at High Altitude, 38

Bridge towers
Energy Analysis of Cable-Stayed Bridges, 571

Bridges
Bridge Management: Computer Aided Priorities, 882
Elastic Stiffness of Bridge Columns with Parabolic Flare and Foundation Springs, 612
Settlement of Simply Supported Birdge, 626

Bridges, arch
Fixed-End Restraint Effect on Steel Arch Strength, 538

Bridges, box girder
Membrane Forces Acting on Box Girder Bridge, 618

Bridges, cable-stayed
Cable Stays Catch On, 890
Design of a Cable-Stayed Steel Composite Bridge, 527
Energy Analysis of Cable-Stayed Bridges, 571
Monitoring a Bridge's Pulse, 861
Sunshine Skyway Nears Completion, 939

Bridges, composite
Design of a Cable-Stayed Steel Composite Bridge, 527
On Modular Full Depth Bridge Deck Rehabilitation, 699
Post-Tensioning Distribution in Composite Bridges, 665

Bridges, concrete
Impact in Railway Prestressed Concrete Bridges, 561
Vibration of PC Bridge During Failure Process, 604

Bridges, girder
Cross-Bracing Effects in Curved Stringer Bridges, 638
Distribution Factors for Curved I-Girder Bridges, 643

Bridges, highway
Foamed Plastic Absorbs Staged Post-Tensioning Deflections, 62
Lateral Distribution of Live Loads on Highway Bridges, 615
Proposed New Truck Weight Limit Formula, 598
Reliability Calibration of a Bridge Design Code, 544
Scenic Squeeze, 845

Bridges, long span
Multispan Balanced Suspension Bridge, 663

Bridges, multi-beam
Skewed, Discretely-Connected, Multi-Beam Bridges, 512

Bridges, piers
Functional Trends of Scour at Bridge Piers, 357
Nonlinear Analysis of Concrete Bridge Piers, 632
Nonlinear Analysis of Integral Abutment Bridges, 647
Salvaging the Zilwaukee, 868

Bridges, railroad
Back on a Full Speed Track, 850
Evaluation of the Noise Level of Steel Railway Bridges, 93
Impact in Railway Prestressed Concrete Bridges, 561

Bridges, steel
Celebrating a Conquest, 935
Design of a Cable-Stayed Steel Composite Bridge, 527
Evaluation of the Noise Level of Steel Railway Bridges, 93
Shopping for a New Bridge Coat, 931
Steel Bridge Counterattack, 929

Bridges, suspension
Lateral Vibration of Suspension Bridges, 641
Multispan Balanced Suspension Bridge, 663

Brines
Measurement of Brine Jet Height and Dilution, 800

Brittle failure
Reliability of Nonlinear Brittle Structures, 631

Bubbles
Development of a Hydrogen Bubble Velocity Meter, 361

Buckling
Buckling and Vibration of Arches and Tied Arches, 587

Buckling Capacities of Monosymmetric I-Beams, 654
Buckling of Monosymmetric I-Beams Under Moment Gradient, 546
Buckling of Tapered Bars under Stepped Axial Loads, 581
Compression Tests of Long Welded I-Section Columns, 648
Compression Tests of Short-Welded I-Sections, 556
Cyclic Load Behavior of Angle-X-Bracing, 664
Cyclic Web Buckling Control for Shear Link Beams, 528
Design of Single Angle Web Struts in Trusses, 580
Fixed-End Restraint Effect on Steel Arch Strength, 538
General Behavior of WF Steel Shear Link Beams, 518
Inelastic Behavior of X-Bracing in Plane Frames, 545
Inelastic Buckling Tests on Beam-Columns, 530
K-Factor Paradox, 609
Large Displacement Elastic Buckling of Space Structures, 562
Local Buckling Behavior of Beam-Columns, 659
Local Web Buckling of Coped Beams, 650
On Plate Buckling Coefficients, 195
Static Stability of Curved Thin-Walled Beams, 235

Budgets
Tracking the Project Budget, 480

Buffeting
Role of Indicial Functions in Buffeting Analysis of Bridges, 1

Building codes
Building Structural Failures—Their Cause and Prevention, 167
Drag Coefficients of Latticed Towers, 521
Earthquake Design Compared to Measured Response, 506
Elastic Earthquake Response of Building Frames, 524
Evaluation of Building Code Formulas for Earthquake Forces, 617
Probabilistic Assessment of the Importance Factor, 652
Proposed Code Provisions for Drifted Snow Loads, 635
Review of Live Loads due to Human Movements, 558
Streamlining the Building Permit Process, 495

Building design
Building Structural Failures—Their Cause and Prevention, 167
Construction of a Semi-Prefabricated Masonry Facade, 20
Designing for Maintainability, 891
Elastic Earthquake Response of Building Frames, 524
Factory Chic, 918
The Public/Private Condo, 863

Building frames
Elastic Earthquake Response of Building Frames, 524

Buildings
Analytical Studies of Building Cladding, 539
Rehabbing for Reuse, 928
Simplified Procedures for Earthquake Analysis of Buildings, 525
Techniques for Rapid Assessment of Seismic Vulnerability, 999

Buildings, office
Governmental Consideration of Large Developments in Urban Areas, 744
The Public/Private Condo, 863

Bulkheads
Tiebacks for Bulkheads, 1001

Bulking
Effect of Influent Property on Filter Performance, 112

Buoyancy
Behavior of Density Currents on an Incline, 359
Buoyancy Driven Exchange Flow in a Horizontal Pipe, 211

Buoyant jets
Inclined Plane Buoyant Jet in Stratified Fluid, 395

Buried pipes
Buried Concrete Pipe Embankment Installation Analysis, 733
Buried Flexible Pipe with Nonuniform Soil Support, 721
Deflections and Bending Moments in Buried Pipes, 717
Load Reduction Factors for Buried Clay Pipes, 709
Soil Stress Distribution Around Buried Pipes, 727
Three-Dimensional Motion of a Buried Pipeline II: Numerical Results, 268
Three-Dimensional Motion of Buried Pipeline I: Analysis, 267

Buried structures
Modified SDOF Analysis of RC Box-Type Structures, 543

Bus usage
Optimizing Dead Mileage in Urban Bus Routes, 700
Simulation Study of Bus Transit, 706

Buses
Downtown Traffic Goes Down Under, 940

Business administration
Civil Entrepreneuring, 906
Contractor, Businessman, 904
Engineer, Manager, and MBA Degree, 485
Planning Engineering and Construction Projects, 990

Business cycles
Contractor, Businessman, 904
Contractors in Cyclical Economic Environments, 41
Engineering Management Planning Using Pressure Cycle Techniques, 486

Cables

Experimental Evaluation of S-N Curves for Drake ACSR Conductor, 283
Lateral Vibration of Suspension Bridges, 641
Natural Frequencies and Modes of Inclined Cables, 505
On Internal Friction Due to Wire Twist in a Bent Cable, 238

Cadmium
Effects of Cd(II) and Cu(II) on a Biofilm System, 69

Caissons
Design Method for Predicting Wave Forces on Rectangular Caissons, 834
Dynamic Response of a Caisson Plate to Wave Impact, 805

Calcareous soils
Uplift Capacity of Bored Piles in Calcareous Soils, 346

Calibration
Case Study: Pipe Network Model Calibration Issues, 762
Explicit Pipe Network Calibration, 757
Phytoplankton in Saginaw Bay: I. Calibration Phase, 89
Practical Aspects of Accurate Tidal Computations, 410
V-Notch Weir Calibration Using New Parameters, 379

California
Beauty and the Bridge, 893
Second Units and Housing Crisis in California, 741

Canals
Canal Capacities for Demand under Surface Irrigation, 466
Estimating the Resistance of a 5 × 3 Barge Tow Moving in Shallow Water, 825
Inland Waterway Navigation Project Design, 833
Microcomputer Simulation of Canal Operation, 460

Cantilevers
Earthquake Load on R/C Beams: Building Versus Single Beam, 592
On Internal Friction Due to Wire Twist in a Bent Cable, 238

Canyons
Computer Modeling of Large Rock Slides, 306
Scenic Squeeze, 845
